MYFLOVE

One calm way through everyday life.

Plan for your capacity. Not just your time.

AI-supported digital everyday support

Connect Öst · Online Pitch Review · September 10, 2026

THE PROBLEM

Everyday life requires more than a to-do list.

People can know exactly what they need to do and still be unable to make the day work.

WHAT NEEDS TO BE DONE

Tasks · Time · Reminders

Traditional tools organise the demands.

WHAT I ACTUALLY HAVE CAPACITY FOR

Energy · Mental load · Invisible work

Rarely accounted for anywhere.

When demands exceed capacity, the person becomes the system.

THE INSIGHT

Plan for capacity, not just time.

A CALENDAR SAYS

"You have three things scheduled today."

MYFLOVE ASKS

"Given how you are today, what is actually reasonable?"

THE SOLUTION

MyFlove turns capacity into a planning signal.

01 — How are you?

Check energy, mood and what is affecting your capacity right now.

02 — What's happening?

Capture what needs to happen — including the invisible work.

03 — Need to adapt?

FlowPlan adjusts the day to the capacity you actually have.

Capture → Understand → Adapt → Continue

THE PRODUCT

One system. One daily flow.

A working web application in use today.

QuickFlow

Get thoughts and tasks out of your head in seconds.

Battery

Understand today's energy and capacity with one tap.

Calendar / Daily Flow

See what is actually happening, on the right day.

Flow / FlowPlan

Find the next reasonable step and adapt when capacity changes.

Complex technology underneath. Simple experience on the surface.

WHY MYFLOVE IS DIFFERENT

From task management to capacity management.

TRADITIONAL TOOLS	MYFLOVE
What needs to be done?	**What can I realistically do?**
Time-based planning	**Capacity-based planning**
Tasks and reminders	**Tasks + energy + context**
User adapts to the system	**System adapts to the user**
Completion-focused	**Sustainable everyday life**

MARKET OPPORTUNITY

A large problem across markets.

MyFlove serves people with high mental load and complex everyday demands — a scalable platform, not a niche diagnosis app.

B2C — Consumers

People who struggle to align everyday demands with their actual capacity.

B2B — Employers

Organizations investing in sustainable digital support and wellbeing.

B2G — Public sector

Municipalities supporting independence and everyday functioning.

Reference points: ADHD prevalence ~2.58% of adults globally (PubMed, 2021) · ~3% of adults in Sweden (Socialstyrelsen) · ADHD app market estimated at $1.9B in 2025, projected $6.7B by 2033 (Grand View Research).

External estimates — not MyFlove user or revenue figures.

TRACTION & VALIDATION

From product to proof.

BUILT

48 users

Functioning MVP · working web application

QuickFlow · Battery / energy · Calendar · Daily Flow · Flow / AI · energy history · weekly overview

NOW: STRUCTURED VALIDATION + PILOT TESTING

We are measuring

Recurring usage · perceived mental load · sense of control · prioritisation · ability to get started · usefulness of QuickFlow and Flow/FlowPlan · willingness to continue · willingness to pay

No paying customers and no clinical outcomes claimed — those are exactly what we are now measuring.

BUSINESS MODEL & GO-TO-MARKET

Prove value first. Scale second.

B2C — now

Free → Premium. Pricing validated before it is set.

B2B — next

Employers and organizations.

B2G — then

Public sector and municipalities.

Pilot | **Validate** | **Launch** | **B2C** | **B2B / B2G** | **Scale**

We are deliberately validating the product and the business model before scaling.

TEAM

Built from lived experience + professional expertise.

Camilla Baksi

Founder, MyFlove

Humanistic Social Pedagogue

Further education in NPF, pedagogy, problematic school absence, and professional response to trauma and difficult events.

Professional experience

Youth coach · support worker · childcare worker

Founder insight

The intersection of professional knowledge, lived experience and product development.

FUNDING

Raising €250K · 18-month runway

Product & technology

iOS / Android · technical stabilization · backend & scalability · security / GDPR

Validation

Structured pilots · analytics · retention measurement · proof of value

Commercialization

Onboarding · launch preparation · initial B2C / B2B / B2G development

MILESTONES BY END OF RUNWAY

Validated product-market fit signals · measured user outcomes · validated retention and recurring use · completed pilot evidence · mobile product ready for broader launch · clearer commercial model and a first scalable customer channel.

Everyday life shouldn't require you to be someone else.

MyFlove adapts the system to the person — not the other way around.

Plan for your capacity. Find your next possible step.

MyFlove · myflove.lovable.app

Live product demo — 20 seconds

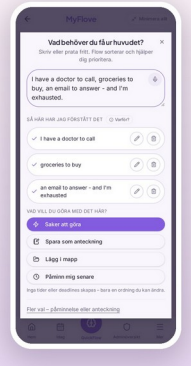

QuickFlow → Flow → My Day. Real screens from the live app.

1 · QUICKFLOW

Everything out of your head, in one place.

You dump it. MyFlove separates it into real, single things.

MyFlove

2 · FLOW

Flow adapts the day to the energy you actually have.

Low energy and two hours — the plan changes with you.

MyFlove

3 · MY DAY

What today actually looks like.

Energy, mood and today's things in one calm view.

MyFlove

“The goal isn’t to get more done. It’s to make the day more doable.”
