MYFLOVE

One calm way through everyday life.

Plan for your capacity. Not just your time.

AI-supported digital everyday support

Connect Öst · Online Pitch Review · September 10, 2026

Knowing what to do is not the hard part.

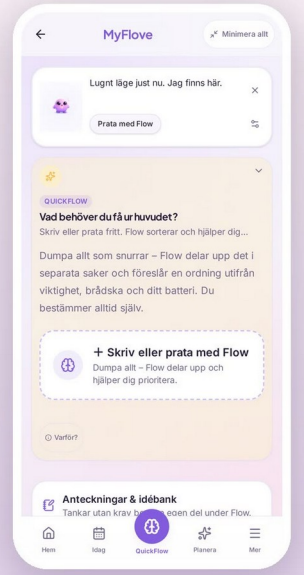

Making the day work when energy, mental load and invisible work keep changing — that is the hard part.

EVERYDAY OVERLOAD

“I have a doctor to call, groceries to buy, an email to answer — and I’m exhausted.”

This is where most days start.

MyFlove

TRADITIONAL TOOLS

Tasks · time · reminders

REAL LIFE

Energy · capacity · invisible work

When demands exceed capacity, the person becomes the system.

Plan for capacity, not just time.

TIME → CAPACITY

That single shift is the product.

A calendar says

“You have three things scheduled today.”

MyFlove asks

**“Given how you are today,
what is actually reasonable?”**

Capacity becomes a planning signal.

1

How are you?

Energy, mood and what affects capacity.

2

What's happening?

Tasks, events and invisible work.

3

Need to adapt?

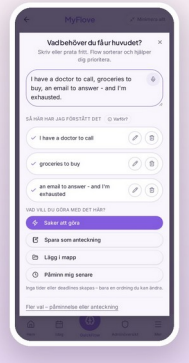

FlowPlan moves, simplifies or splits.

1 · QUICKFLOW

Everything out of your head, in one place.

You dump it. MyFlove separates it into real, single things.

MyFlove

2 · FLOW

Flow adapts the day to the energy you actually have.

Low energy and two hours — the plan changes with you.

MyFlove

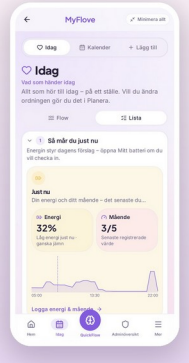

3 · MY DAY

What today actually looks like.

Energy, mood and today's things in one calm view.

MyFlove

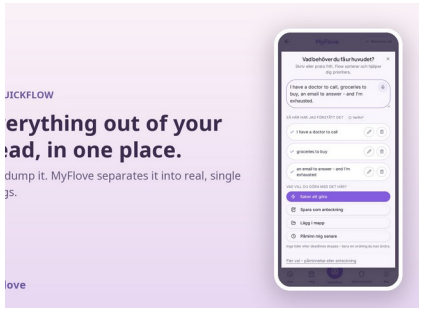

CAPTURE

UNDERSTAND + ADAPT

CONTINUE

One system. One daily flow.

A working web application in use today.

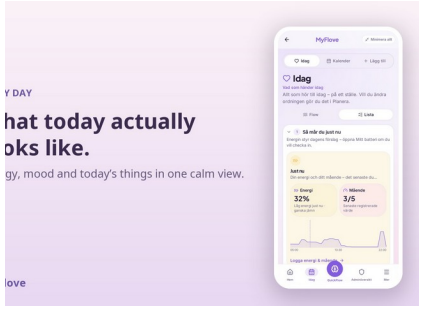

QuickFlow

Empty your head in seconds.

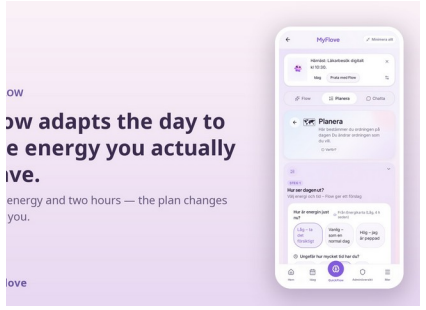

Battery

Name today's capacity.

My Day

See what is real today.

Flow / FlowPlan

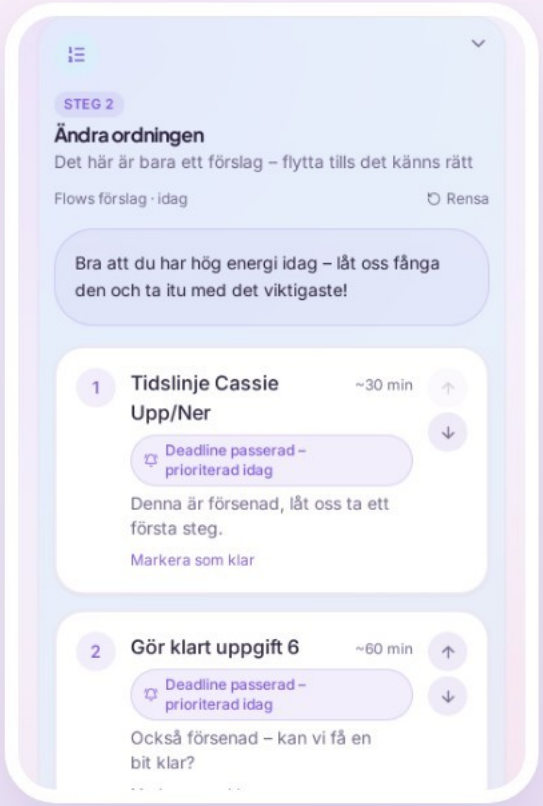

Find the next reasonable step.

Complex underneath. Deliberately simple on the surface.

4 · THE PLAN ADAPTS

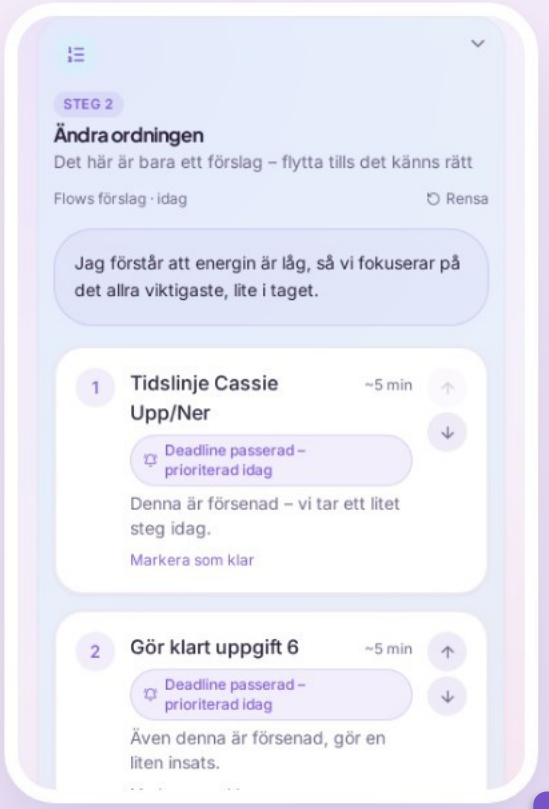

Same tasks. A different day.

High energy · 4 hours

Bigger steps · 30–60 min each

Low energy · 30 minutes

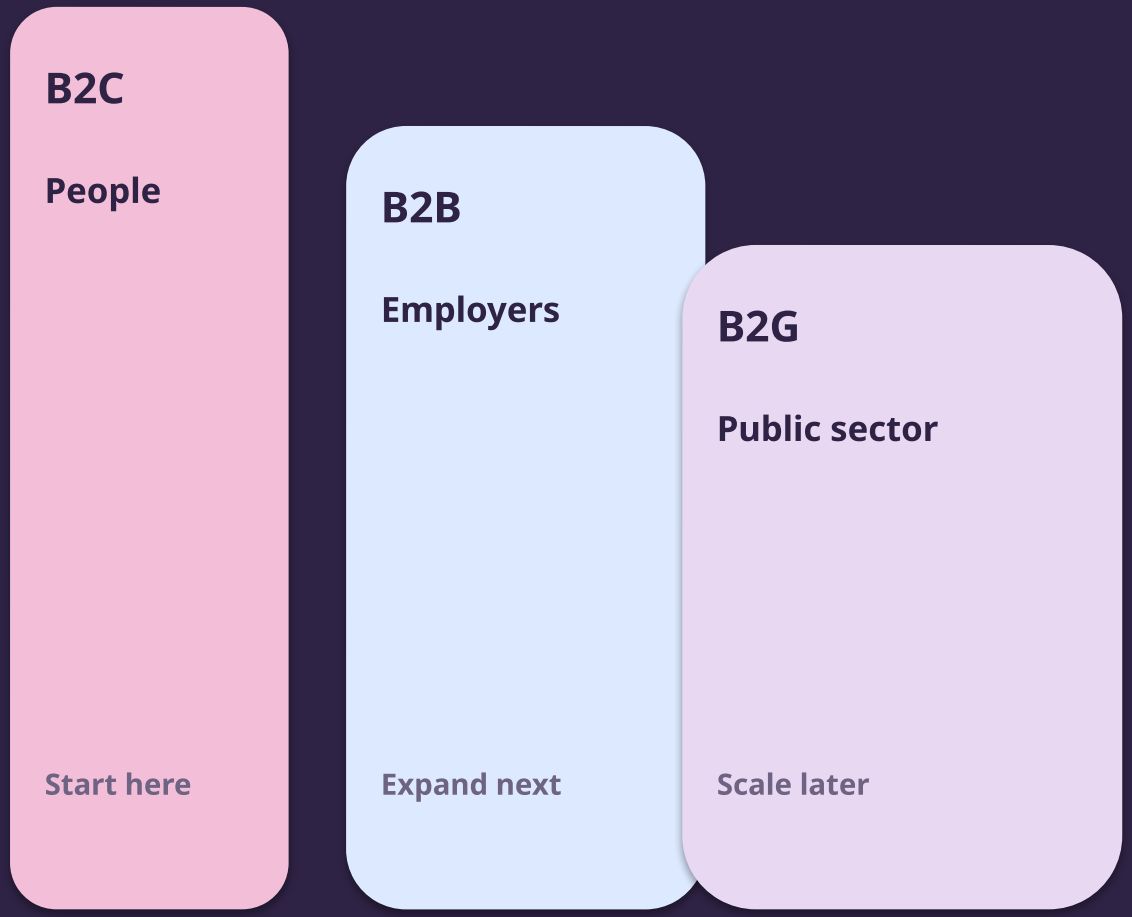

Same list · 5–10 min steps

The system adapts to you.

One capacity problem. Three routes to scale.

A scalable platform for people with high mental load and complex everyday demands.

External reference points: adult ADHD prevalence ≈2.58% globally (PubMed, 2021), ≈3% in Sweden (Socialstyrelsen); ADHD app market $1.9B in 2025 → $6.7B by 2033 (Grand View Research). Not MyFlove user or revenue figures.

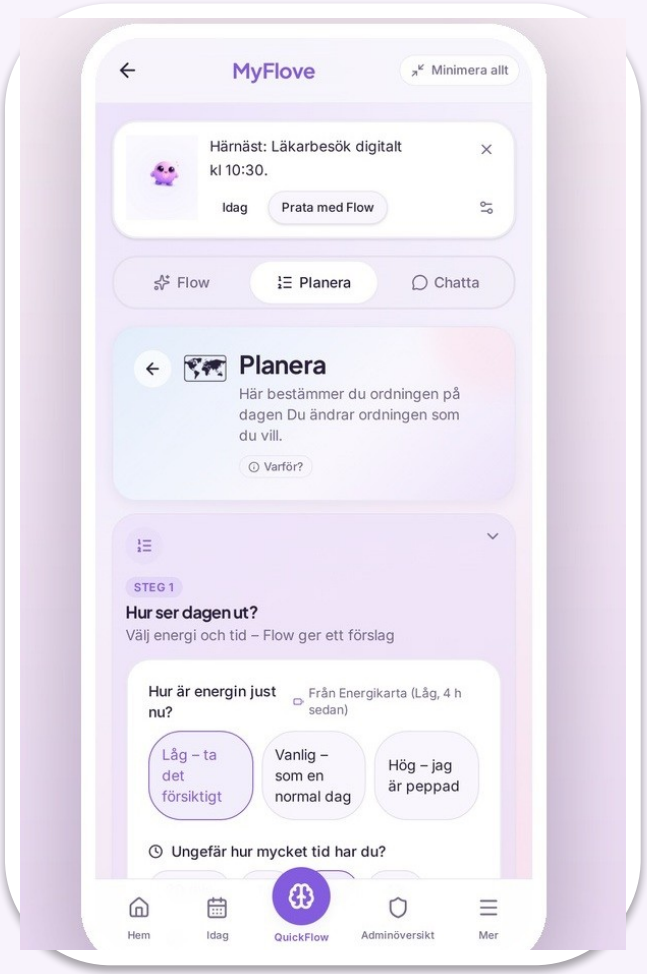

From product to proof.

VALIDATION

Pilots · analytics · retention · proof

COMMERCIAL

Onboarding · launch · first channels

END-OF-RUNWAY PROOF

Measured outcomes · validated retention · pilot evidence · mobile ready · clearer commercial model · first scalable customer channel

Everyday life shouldn't require you to be someone else.

MyFlove adapts the system to the person — not the other way around.

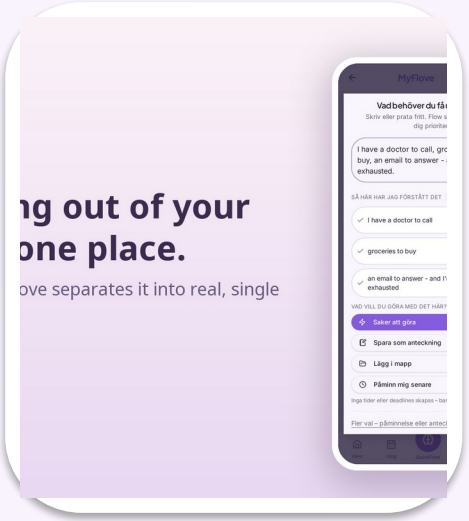

Plan for your capacity. Find your next possible step.
